Hazards What are the hazards?	**Effects** What might happen because of this hazard?	**Mitigations** How have you reduced the risk already?	**Likelihood of risk occurring after mitigations** (1=low, 2=medium, 3=high)	**The impact of the risk after mitigations** (1=low, 2=medium, 3=high)	**Total Risk Score**
Physical hazards are relatively easy to spot but some other kinds need to be thought about.	The possible effects of any hazard can vary. You may therefore want to think of a range of effects for certain hazards.	Consider what can be done to minimise the risks.	How likely is it that the effect will happen?	How bad would the effect be if it happened?	
Unloading the car	*People may hurt their back carrying heavy equipment or resources long distances*	*Instruct the person that needs to unload to park near the door while doing so and move the car afterwards. Pack the resources into smaller, more manageable boxes. Members & their carers know how to unload their own personal items.*	1	1	1
Potholes in car park or poor car parking facility.	*Someone might fall over or too far to walk.*	*Let people know that the car park ground is uneven beforehand and it's location.*	1	1	1
No disabled access to venue	*Difficult to get wheelchairs in, could cause problems for the person pushing and the person in the wheelchair*	*Agreed with the venue that they will provide a disabled ramp and support people getting wheelchairs up it*	1	1	1
Fire doors need to be easily accessed and marked clearly	*If they are obstructed or not clear and there is a fire, people may get stuck in the venue*	*Ensure that fire doors are free of obstructions on arrival. Make sure that everyone knows where the exits are in case of a fire*	1	1	1
Fire Extinguishers	*There may not be any in case of emergency*	*Ensure that there are extinguishers fitted and that they are maintained and suitably located and responsible person from location is aware of our meeting.*	1	1	1
Slips, trips and falls in the venue	*From minor injuries to broken bones*	*Floor is suitable for indoor football, game is stopped if someone falls and is helped up, walking aids are encouraged during the game, at least 8 volunteers are always present to oversee and assist. Arena first aider is available if required.*	2	2	4
Incidents requiring more support	*Person may require first aid or higher level attention*	*Arena First Aider to be called as a first response to make assessment. Based on assessment, appropriate action will follow i.e. ambulance etc.*	2	2	4
Being hit by the football during a game	*Minor injuries / short term pain*	*All participants play at a very slow speed.*	1	1	1
Exhaustion from too much effort	*Tiredness, fatigue and lack of attention*	*All support volunteers are looking out for anyone in difficulty at all times.*	1	1	1
