CIRENCESTER AND STROUD BRANCH - RISK ASSESSMENT

	B STROOD BRAILER I		174/17	
LOCATION	: Cam Council	Offices, Cam	CHA	
PURPOSE	: Monthly Members Meeting	FIND		
ASSESSMENT DATE	. 06/11	L/2023	JOIN	
ASSESSED BY	: Kevin	Young		
RENEWAL DATE	06/11/2024			
Hazards What are the hazards?	Effects What might happen because of this hazard?	Mitigations How have you reduced the risk already?	Likelihood of risk occurring after mitigations (1=low, 2=medium, 3=high)	
Physical hazards are relatively easy to spot but some other kinds need to be thought about.	The possible effects of any hazard can vary. You may therefore want to think of a range of effects for certain hazards.	Consider what can be done to minimise the risks.	How likely is it that the effect will happen?	
Unloading the car	People may hurt their back carrying heavy equipment or resources long distances	Instruct the person that needs to unload to park near the door while doing so and move the car afterwards. Pack the resources into smaller, more manageable boxes. Members & their carers know how to unload their own nersonal items	1	
Potholes in car park or poor car parking facility.	Someone might fall over or too far to walk.	Let people know that the car park ground is uneven beforehand and it's location.	2	
No disabled access to venue	Difficult to get wheelchairs in, could cause problems for the person pushing and the person in the wheelchair	Agreed with the venue that they will provide a disabled ramp and support people getting wheelchairs up it	1	
Fire doors need to be easily accessed and marked clearly	If they are obstructed or not clear and there is a fire, people may get stuck in the venue	Ensure that fire doors are free of obstructions on arrival. Make sure that everyone knows where the exits are in case of a fire	1	
		Ensure that there are extinguishers fitted and		

		park near the door while doing so and move			
the transfer with a series	People may hurt their back carrying heavy	the car afterwards. Pack the resources into	1	1	1
